SERVICE GUIDE

White Glove Deep Cleaning Experience™

Starting at $1,500

White Glove begins with a closer conversation about the areas that matter to you and the condition of your home. We build an individual deep-cleaning scope for those accessible spaces, with attention to suitable detail work and an agreed final review. We confirm the rooms, tasks and quantities in your written plan so the team arrives prepared for the work you choose.

How we approach your care

We look at finishes, existing wear, buildup, previous treatments and safe access before selecting suitable methods. Buildup on approved shower glass, for example, may respond differently from dust on a delicate blind. When trim is selected, it means the agreed baseboards, door or window casings and finishing moldings. We identify the selected pieces in your proposal. The team prepares suitable professional products and tools for the approved work.

Your selected care

- Agreed kitchens, bathroom suites, toilets, sinks, mirrors, showers, shower glass and tubs.
- Suitable cleaning of buildup within the approved material and condition limits.
- Accessible trim, baseboards, corners and cleared furniture surfaces.
- Agreed accessible interior window glass, interior sills, frames and blinds.
- Material-appropriate cleaning of the agreed floors.
- Final review by room within the agreed scope.
- Existing bedding presentation and bin collection only when expressly included.

SERVICE GUIDE

A clear plan, prepared together.

What to expect

Blind care depends on material, finish and condition; stains, discoloration or embedded dust may remain. Fragile blinds may need limited care. We recommend two White Glove visits per year, with separately arranged maintenance between, to revisit buildup and accessible details. Your home may need a different rhythm; complete restoration is not promised.

Before we arrive

Identify window and blind quantities, delicate finishes, loose items and anything to leave untouched. Clear agreed surfaces before arrival.

Outside this selection

- Window tracks, channels, exterior window glass or exterior window work.
- Appliance interiors, specialty restoration or unlisted areas by default.
- Steam or specialized treatment, leadership welcome and a particular crew size unless individually confirmed in writing.

Your individual proposal

We prepare your quote around the selected tasks and quantities, material, condition and safe access. Square footage helps us plan, while the work your home actually needs shapes the final scope and price. Your written quote confirms those details and shows any applicable tax.

A comfortable, safe visit. Please secure valuables and fragile items and clear the agreed work areas. We do not move heavy furniture, loaded tables, appliances or pet enclosures. Pet waste, litter boxes, bowls, toys, bedding and other pet belongings are not cleaned, moved or handled. Keep pets safely away. Blocked or unsafe areas are reported as not performed.

Clear boundaries. Window care is limited to expressly agreed accessible interior glass, sills, frames and blinds where the service includes it. Tracks, channels and exterior window work are excluded. Material limits apply; complete removal is not guaranteed. New cleaning orders exclude laundry, dishes, organizing, closet and storage interiors, and handling décor or valuables.

Your plan stays clear. Your written order identifies the chosen work. There are no on-site additions or room/item exchanges. Advance changes require review and signatures from you and an authorized company representative before changed work. We respect stop-work instructions immediately. Your agreement governs scheduling, payment and rights; previously accepted terms remain protected.
